A Wealth of Opportunities

Remote Operations Technician (MT-F.24)

25 Positions Available

Join a Global, World-Class Company

Our vision of tomorrow is computing and communications anytime-anywhere. Our success depends on talented employees around the world who are passionate about technology. Are you ready to make the most of your mind?

From the outside, Intel Corporation has a lot to offer: high performance, innovative design, and exciting technology—but look under the hood and you'll find more to Intel than an engine ready to race—you'll find a commitment to social responsibility and the environment we live in.

Job Description

As a Fab-24 Remote Operations Technician you will be responsible for the operational performance of multiple module teams within the Fab 24 300mm production facility. This includes monitoring and operation of the advanced automation ROC workstations, co-ordination of manufacturing technician teams and liaising with shift co-ordinator and process engineering team to understand overall factory priorities.

Qualifications

A relevant Technical qualification (tytuł inżyniera) and a minimum of 2 years relevant experience.

Very good English

Salary/Other Benefits

Intel Ireland offers extremely competitive remuneration & benefits packages

Intel Ireland also offer generous assistance towards relocation to successful applicants, this will be discussed further at interview.
